C How to Program, 8/e introduces procedural programming in C and object-oriented and generic programming in C++. It's appropriate for introductory- and intermediate-level C and C++ programming courses. At the heart of the book is the Deitel signature live-code approach—we present most concepts in the context of complete working programs followed by sample executions, rather than in code ...

Types of operating systems Single-tasking and multi-tasking. A single-tasking system can only run one program at a time, while a multi-tasking operating system allows more than one program to be running in concurrency. This is achieved by time-sharing, where the available processor time is divided between multiple processes. These processes are each interrupted repeatedly in time slices by a ...
