Even so, a used Maximat V10P will be better than most any new Asian imports of similar size if you can find one. For completeness, I should mention the largest of the Emco manual lathes, the Emco V13. It is just a bigger Super 11, with all the same features. If you want a good lathe at a fair price, have a look at the PM1236T.

[Used Maximat for sale. Emco equipment & more | Machinio](#)

I suspect that with new Maximat Super 11s going for \$9400 without tooling, someone who WANTS that precision (in a smaller machine) might pay upwards of maybe \$5k to \$6k for a "new" (unused, mint, etc.) V10P, more with tooling. There's not much in that size range with the build quality of the Emco. [02-07-2005, 08:21 PM: Message edited by: dennh]
